How does this work? USCACforK is a closed community of the US investors. We buy cryptocurrencies in the US exchange on behalf of investors in South Korea and send them to the SK investors wallet. You (SK investors) need to post your desired coin type, amount, and price. The price needs to be higher than the price in the US. We then contact you individually to do the transactions. You can pay via either credit card settlement, or international transfer. Based on your transaction records and our decision you can do this arbitrage transactions multiple times

Post your demand

(Exchanges you are using / Preferred coin / amount / Your ask price per coin)
(e.g., Bithumb / BTC / 0.65/ \$35000)

	post
Bithumb / BTC 0.65/ \$35000 / I can do this multiple times
